

GENDER AND HIV IN MARYLAND, 2013

AUGUST 2015

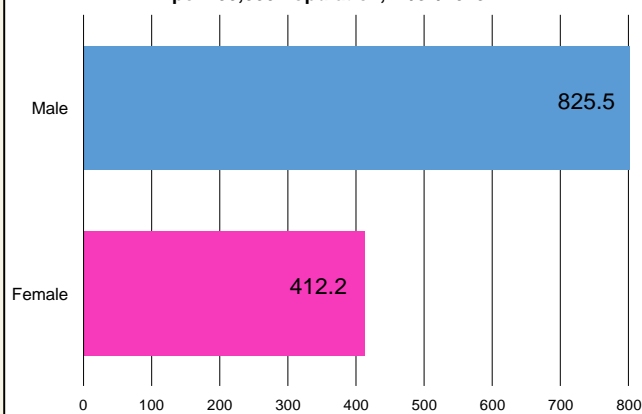

Living Adult/Adolescent Maryland HIV Cases
12/31/2013 (N=33,615)

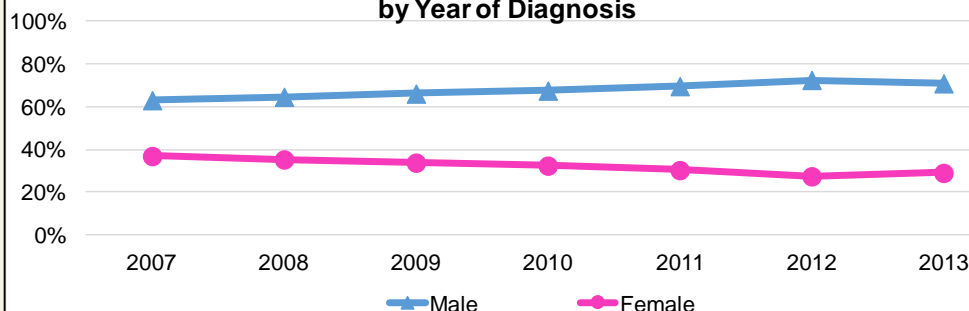

- **Transgender persons** account for roughly one percent of all HIV cases, however, there is likely to be incomplete reporting of transgender status and studies have shown high rates of HIV in transgender people.
- A 2004-5 survey of **84 transgender persons** in Baltimore measured HIV rates of **40%**, **17 times higher** than the **2%** rate for all adults/adolescents in Baltimore City.

- There are almost **twice** as many **males** with HIV as females (**64% vs. 35%**).
- **Males** are **twice** as likely to have HIV as females. Among living adult/adolescent cases of HIV in Maryland there were **825.5 cases per 100,000 males** and **412.2 cases per 100,000 females**.

Living Adult/Adolescent Maryland HIV Cases
per 100,000 Population, 12/31/2013

Adult/Adolescent Maryland HIV Diagnoses
by Year of Diagnosis

- The proportion of new HIV diagnoses that were **male decreased** from **73%** in 2012 to **71%** in 2013. **Females increased** from **27%** in 2012 to **29%** in 2013.
